July 26, 2016, 03:48

Last night I got my ASA working with ASDM but today when I try to connect i get an invalid certificate error . I deleted the certificates from Firefox. Ok, that worked, I thought I'd have to create the file wlc-backup- config first somehow. The problem is it just stopet working, its not publishing any wifi networks. IBM WebSphere Application Server provides periodic fixes for the base and Network Deployment editions of release V8.5. The following is a complete listing of fixes. Fixed in 7.50.1 - August 3 2016 . Bugfixes: TLS: switch off SSL session id when client cert is used; TLS: only reuse connections with the same client cert
